METERING, MIXING & DISPENSING OF 2-PART MATERIALS
SYSTEMS & CONSUMABLES
Piston pump metering
- Precise volumetric fixed ratio metering
- Single acting positive displacement
- Adjustable shot volume metering
- Pneumatic or electric drive units
- Disposable static or rotary/static mixing
- Wide material viscosity acceptance (liquid to paste)
- Table top or floor standing machines
- Dispense head can be robot mounted

** Depending upon pump sizes selected
METERING, MIXING & DISPENSING OF 2-PART MATERIALS

• Designed for micro-shot dispensing (down to 0.04ml)  
• Precise volumetric fixed ratio metering  
• Single acting positive displacement  
• Adjustable shot volume metering  
• Pneumatic or electric drive units  
• Disposable static mixing  
• Low to medium viscosity acceptance  
• Table top or robot mounted

PAR 20C
Portable floor standing machine

Rod displacement metering

MIXING NOZZLES AND CARTRIDGES
The full range of disposable static and rotary static mixers are available from stock.
Gear pump metering

- Precise programmable ratio metering
- Constant flow dispensing
- Independent electric drive units
- Disposable static or rotary/static mixing
- Low to medium viscosity acceptance
- Table top or floor standing machines
- Dispense head can be robot mounted

ABOUT METER MIX®

METER MIX® Systems Ltd was established in 1989 with the aim of producing reliable machines for processing single and two component materials. Materials successfully processed using METER MIX® equipment include epoxy, polyurethane, silicone, polysulphide, polyester and methacrylate based resins as well as greases and oils, which are utilised in a wide diversity of manufacturing operations. Our knowledgeable and professional Sales & Technical team work in close co-operation with the customer and material manufacturer to ensure that the machine specification is tailored to suit both the processing parameters of the material as well as the requirements of the application. As a company, we fully respect the confidential nature of the projects in which we are involved and our impartial and ethical approach provides an assurance that the most suitable solution is provided.

R&D

As a manufacturer of meter, mix and dispense machines, the company works in close collaboration with all major material manufacturers so as to develop and evolve the product range to meet the latest formulation and application requirements. Extensive test and demonstration facilities ensure that all METER MIX® components and machines are able to provide reliability and longevity in the ever more demanding requirements of today’s manufacturing industries.

AFTER SALES SERVICE

All components and machines are carefully and extensively tested before delivery to the customer. The company’s experienced and fully trained technicians are available to commission the equipment at the customer’s site and provide full operative training. Once in production, our team of skilled and dedicated service engineers are available to provide preventative maintenance by means of service contracts or reactive support where required. Standard parts, service kits and consumable items such as static mixing nozzles are readily available from stock.
